Boundaries

What Glance does

- Filters events through your holdings.
- Explains impact with causal links and receipts.
- Offers a few realistic options with protections.

What Glance does NOT do

- Does not execute trades or access your broker to place orders.
- Does not guarantee outcomes or accuracy.
- Is not a registered investment advisor.

How to use it safely

- Verify receipts before acting.
- Start with practice or starter size.
- Use protections when uncertain.

Failure modes (so you're not surprised)

- Data delay
  sources may lag.
- Ambiguity
  conflicting reports.
- Low relevance
  weak causal links.
- Noise spikes
  macro days.

Got it

You stay in control of every order.
